Subject to mistakes and technical changes

Test Seals

ABUS locks are tested and acknowledged by independent, neutral test institutes in several European countries. The following test seals confirm the extraordinary security of the ABUS 2-Wheel locks:

Test Seal of the Svensk Brand- och Säkerhetscertifiering AB – Stockholm, Sweden

Test Seal of the Norges Forsikringsforbund – Oslo, Norway

Test Seal of the Vahinkovakuutusyhtiöiden Hyväksymä – Helsinki, Finland

Test Seal of Stichting ART – The Netherlands

Test Seal of the THATCHAM VEHICLE SECURITY – Great Britain

Test Seal of OSIMZ, Moscow, Russia

Test Seal of VdS – Cologne, Germany

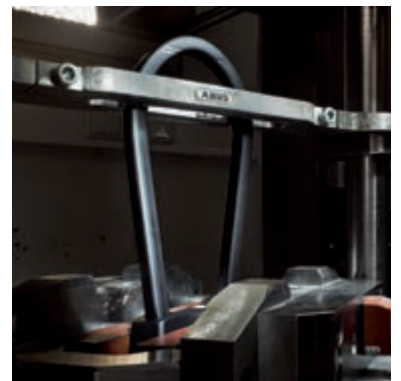

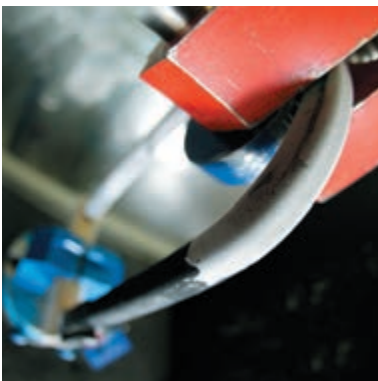

ABUS Seal for Ice Spray Test – Volmarstein, Germany

Test Seals of various national and international magazines

These acknowledgements are based on ABUS internal product tests in the company test laboratory. Here, ABUS test the locks on their security and durability in large scale tests permanently. The resulting standards from the basis of the ABUS Level System is the customer-friendly classification system.

The ABUS level system

The ABUS level system

Clear, consistent, simple.

The packaging of a security product influences the buying decision of your customers!

As part of our packaging concept, which is characterised by a clear, steady and modern presentation of our product range, you and your customers also benefit from a level system, which provides information on the security ranking of our products.

The ABUS level system is transparent and simplified system that represents exclusively the level of security of the locks. The level system – pictured as a speedometer – reaches level 15 for bicycle locks and level 20 for motorbike locks.

With the level system, a better understanding for the customer is achieved and conveys, already at the first glance, one of the key considerations when buying a security product: the level of security.

The result: a modern appearance at the point of sale, which promotes your sale actively!

Maximum Security
Level: 10-20

Extra Security
Level: 5-9

Standard Security
Level: 1-4

GRANIT™

Tough Security.

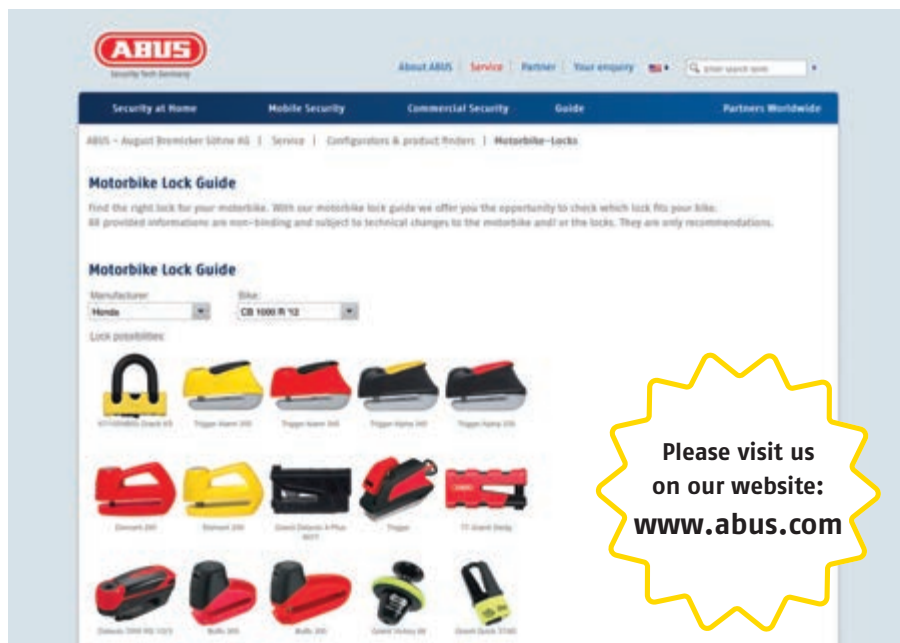

MADE IN
GERMANY

Best security has a name: Granit. The Granit locks are known to be made with the best materials, the best technology and many patents.

- 1 ABUS XPlus cylinder: The ultimate resistance against intelligent opening methods e.g. picking
- 2 Power Cell Technology makes pulling and breaking forces spread through the whole lock, using the resistance of the complete lock
- 3 Square shackles force the thief to cut the shackle twice as it can not be twisted open
- 4 The parabolic shaped shackle generates at least two contact points with every object being used to pull on the shackle – this reduces the breaking force coming on one point
- 5 A special steel alloy and a particular hardening process make the shackle hard, resisting sawing attacks, but still flexible enough to withstand torsion attacks
- 6 Power Link Technology means direct locking of the chain end link into the highly resistant locking mechanism
- 7 High quality chain produced according to special ABUS specifications

Motorbike Guide: A special service.

<http://www.abus.com/eng/Service/Configurators-product-finders/Motorbike-Locks>

The ABUS "Motorbike Guide" on www.abus-motorrad.de gives you the interactive possibility to look for the lock that fits to your bike. This service provides you with recommendations regarding compatibility of different brake disc locks and gives information about transportation options (seat, bracket etc.) on the particular bike.

The ABUS database includes a large number of different motorbikes. All information is without obligation and subject to technical modifications to the motorbikes and/or the locks. The information is a recommendation only!

ABUS Break Disc Lock Finder

Find the right break disc lock – quick and easy

ABUS holds a gadget for all motorbike- and scooter owners, which helps to find the perfect break disc lock. This finder includes templates with the measurements of the bolts of all ABUS break disc lock and reveals quick and easy, whether a break disc lock fits a two-wheeler or not.

TIP:

Your customers can easily find out at home which ABUS break disc lock fits their two-wheelers: Just go to www.abus.com to the favored lock, click on „Downloads“, download the template, print, cut out and see if the lock fits the disc!

U-Shackle Locks

59

58

540

NEW!

402

GRANIT™ Extreme 59

SH 59

GIVI adapter plate M6M

Operation and use

- Very good protection at high theft risk
- Recommended for securing valuable motorbikes

Technology and features

- 16 mm patented square parabolic shackle (19 mm coating)
- Double bolted shackle in the lock body
- The shackle, the lock body as well as supporting elements of the locking mechanism are made of special hardened steel
- ABUS XPlus cylinder for highest protection against manipulations, e.g. picking
- Two keys are supplied with the lock, one LED lighted
- Manually operated keyhole cover against dirt and corrosion
- ABUS Code Card for additional or replacement keys

Holder and transportation

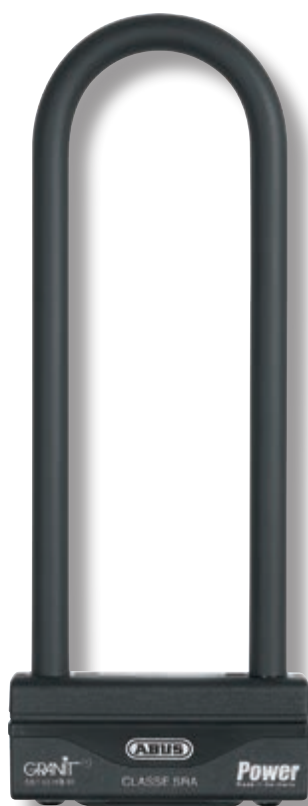

- SH 59 - easy to mount bracket on tubes with round diameters (12-17 mm)
- The monolock adapter plate of GIVI serves as fully integrated mounting option that enables the straightforward fastening of almost all ABUS motorbike U-Locks starting from a shackle height of 300 mm

Tip

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code
- Locks of the U-shackle category belong to the most resistant locks in general
- To increase the security during longer parking time it is recommendable to secure the motorbike to a fixed object additionally

GRANIT XPlus™ 540

GIVI adapter plate M6M

Operation and use

- Good protection at high theft risk
- Recommended for securing entry motorbikes, light motorbikes and scooters

Technology and features

- Patented 13 mm square parabolic shackle (16 mm with coating)
- Double bolted shackle in the lock body
- ABUS power cell technology (patented) offers highest protection against hitting and pulling attacks
- The shackle, the case as well as supporting elements of the locking mechanism are made of special hardened steel
- ABUS XPlus cylinder for highest protection against manipulations, e.g. picking
- Two keys are supplied with the lock, one LED-lighted
- Automatic keyhole cover against dirt and corrosion
- ABUS Code Card for additional or replacement key

Holder and transportation

- The monolock adapter plate of GIVI serves as fully integrated mounting option that enables the straightforward fastening of almost all ABUS motorbike U-Locks starting from a shackle height of 300 mm

Tip

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code

540/160HB300	18894 7	299	108	16	1656		6

Operation and use

- Basic protection at low theft risk
- Recommended for securing light motorbikes and scooters

Technology and features

- 11 mm, hardened steel round shackle
- Double bolted shackle in the lock body
- The shackle, the lock body as well as supporting elements of the locking mechanism are made of special hardened steel
- Ergonomic shape allows best handling
- Premium cylinder for high protection against manipulations, e.g. picking
- Four keys are supplied with the lock

Tip

- Fits in every helmet compartment

GRANIT™ Extreme Plus 59

ST 1010

Operation and use

- Very good protection at high theft risk
- Recommended for securing valuable motorbikes
- The longer the chain, the easier the motorbike can be locked to a fixed object

Technology and features

- 12 mm strong chain with fabric sleeve to prevent damage to the motorbike's paintwork
- ABUS Power Link Technology (patented) offers a direct and covered locking of the chain into the locking mechanism
- The chain, the lock body as well as supporting elements of the locking mechanism are made of special hardened steel
- ABUS XPlus cylinder for highest protection against manipulations e.g. picking
- Two keys are supplied with the lock, one LED lighted
- Manually operated keyhole cover against dirt and corrosion
- ABUS Code Card for additional or replacement key

Tip

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code
- Chain lock combinations are a very good solution for locking a motorbike to a fixed object
- Very handy use because only one end of the chain must be locked
- To limit the possibilities of brutal attacks it is recommendable to avoid that the chain lays on or hangs close to the ground
- For the protected transport we recommend the bag ST1010 (matches only 110 and 140 cm length)

GRANIT™ Power Chain 37 14KS Black Loop

Operation and use

- Very good protection at high theft risk
- Recommended for securing valuable motorbikes

Technology and features

- 14 mm strong loop chain with fabric sleeve to prevent damage to the motorbike's paintwork
- Double bolted 14 mm shackle in the lock body
- Cylinder inserted into the padlock from the top for optimum drill and pull resistance
- Shackle guard protects against attacks with tools
- The padlock is coated with Black Granit coating for even more corrosion resistance
- The chain, the shackle, the padlock body as well as supporting elements of the locking mechanism are made of special hardened steel
- ABUS Plus cylinder for high protection against manipulations, e.g. picking
- Two keys are supplied with the lock, one LED lighted
- ABUS Code Card for additional or replacement key

Tip

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code
- Chain lock combinations are a very good solution for locking a motorbike to a fixed object
- To limit the possibilities of brutal attacks it is recommendable to avoid that the chain lays on or hangs close to the ground

GRANIT™ Detecto XPlus 8008 12KS Black Loop

Operation and use

- Very Good protection at high theft risk
- Recommended for securing valuable motorbikes

Technology and features

- 12 mm strong loop chain with fabric sleeve to prevent damage to the motorbike's paintwork
- The chain, the 16 mm bolt, the lock body as well as supporting elements of the locking mechanism are made of special hardened steel
- Alarm function on basis of the ABUS 3D detection system that means, that every movement is detected
- Alarm of at least 100 dB
- Lock can be transported in locked condition without activated detection system thanks to automatic brake disc recognition system
- Different acoustic signals inform about battery- and activation status
- ABUS XPlus cylinder for highest protection against manipulations, e.g. picking
- Two keys are supplied with the lock, one LED lighted
- ABUS Code Card for additional or replacement keys
- One CR2 Battery for the alarm function is included

Tip

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code
- Chain lock combinations are a very good solution for locking a motorbike to a fixed object
- The loop chain permits a very efficient use of the chain length
- Very handy use because only one end of the chain must be locked
- Two in one lock that means that the brake disc lock can also be used without the chain
- The chain has a special end link and can only be used in combination with the Detecto 8008 brake disc lock
- Please note that the chain combination does not necessarily fit on the same brake discs like the lock alone
- To limit the possibilities of brutal attacks it is recommendable to avoid that the chain lays on or hangs close to the ground

Steel-O-Chain™ Ivy 9100

ST 1010

Operation and use

- Good protection at low theft risk
- Recommended for securing entry level motorbikes and scooters
- The longer the chain, the easier the motorbike can be locked to a fixed object

Technology and features

- 10 mm strong square chain, with functional, long-life and highly-flexible mesh sleeve to prevent from damage to the motorbike's paintwork
- Mesh sleeve provides high protection against abrasion and absorbs any liquids, e.g. water, oil
- The chain, the lock body as well as supporting elements of the locking mechanism are made of special hardened steel
- Ergonomic lock body cover with SCT Soft Case Technology, which offers a very high impact resistance
- Premium cylinder for high protection against manipulations, e.g. picking
- Two user-friendly reversible keys are supplied with the lock

Tip

- Chain lock combinations are a very good solution for locking a motorbike to a fixed object
- Very handy use because only one end of the chain must be locked
- To limit the possibilities of brutal attacks it is recommendable to avoid that the chain lays on or hangs close to the ground
- For the protected transport we recommend the bag ST1010 (matches only 110 and 140 cm length)

Operation and use

- Very good protection at high theft risk
- Recommended for securing valuable motorbikes

Technology and features

- 16 mm steel bolt
- The bolt as well as supporting elements of the locking mechanism are made of special hardened steel
- Alarm function on basis of the ABUS 3D detection system that means, that every movement is detected
- Alarm of at least 100 dB
- Lock can be transported in locked condition without activated detection system thanks to automatic brake disc recognition system
- Different acoustic signals inform about battery, activation and alarm status
- ABUS XPlus cylinder for highest protection against manipulations, e.g. picking
- Two keys are supplied with the lock, one LED lighted
- ABUS Code Card for additional or replacement keys
- One CR2 Battery for the alarm function is included

Holder and transportation

- Protective bag included for easy and secure transportation in a special compartment e.g. under the seat

Tip

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code
- Brake disk locks are a very compact category of motorbike locks and consequently easy to transport
- To increase the security during longer parking time it is recommendable to secure the motorbike to a fixed object additionally
- Thanks to the 3D detection system the motorbike rider gets warned when lifting the bike into upright position and an unintended ride off with the locked bike is prevented

Operation and use

- The anchor allows the locking of two-wheel vehicles in garages, cellars, at houses and carports. The WBA 100 can be mounted to the ground as well as to the wall. In combination with a high level ABUS lock it builds a very secure unit.

Technology and features

- 16 mm round shackle made of special hardened steel for highest resistance
- Mounting accessories included

Tip

- After installing this anchor correctly it can only be removed with a considerable effort - the usage in rented places has to be checked by the installer
- Due to the flat design and the high quality plastic, the WBA can be overrun by vehicles without any problem e.g. in garages
- The WBA 100 is weatherproof and can be installed indoors or outdoors

Multiloop 210

Operation and use

- Good protection at low theft risk
- Security device for accessory such as helmets, jackets or protectors
- Multi-purpose application for garden, home, leisure etc.
- Because of variable adjustable loops, the attachment on stable objects or the connection of various objects is highly flexible

Technology and features

- 10 mm strong premium steel cable
- PVC-coating to prevent damage to the motorbike's paintwork
- Semi-transparent silicone coating on the lock body with „soft touch“ properties for better grip
- Integrated adapter in the body for a conversion from one loop to a double-loop cable
- Quality lock cylinder
- Two keys are supplied with the lock

Tip

- Cable locks stand out due to good flexibility and quite low weight
- Through the possibility of variably adjustable loop, the total length of about two meters can be ideally used and adapted to different objects.

Ref. No.	EAN			Weight	Carrier	Box

Shop in Store – the flexible display solution

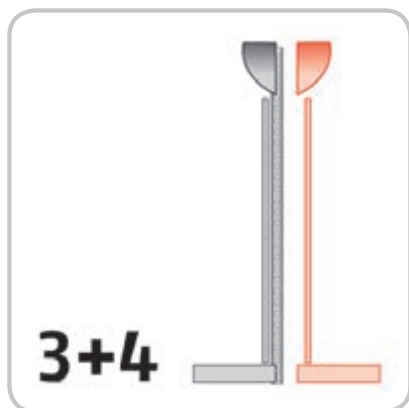

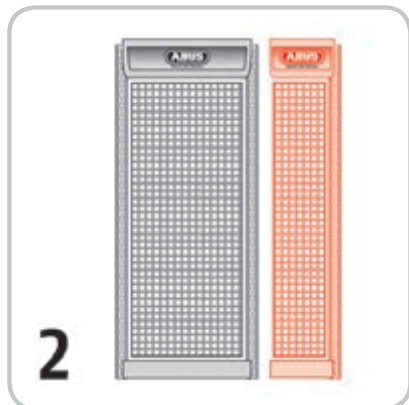

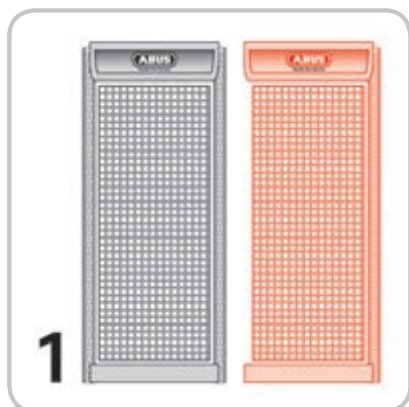

Shop in store opens the door to a new world of display solutions. The one meter wide basic display is supplied in two different heights (220 cm and 140 cm) and can be fitted in any site by use of modular extensions – as many as you need.

For the lateral extension there are sets available in one and half meters. If appropriate to use both the back and front of the display thanks to the Shop in Store, you will no longer need a separate display, but a compact additional set.

Further, an attractive aisle stopper is included in the delivery, to make your POS more attractive and more informative. Additional easily assembled illuminated headers for the 220 cm displays are an optional extra.

For the presentation of high quality products you can also order a heavy duty crossbar together with the corresponding hooks that will ensure safe weight loading. Altogether, the Shop in Store system offers a complete tailor-made solution package for your ABUS sales area.
