ABUS QUIN SYSTEM CRASH DETECTION

QUIN is your personal emergency call center in your helmet. This means that the ABUS QUIN helmets now have an integrated accelerometer that detects and measures falls. In the event of a crash, the system notifies a previously selected person and sends them the location data of the person who has fallen via tracking.

The designated contact person will then be able to coordinate the rescue of the person who has fallen. However, not every emergency is necessarily a crash. In the event of other dangers or a breakdown, quick help is also desired. This is why the ABUS QUIN system can also be triggered manually – just in case.

STORMCHASER NEVER COMPROMISE

The **ABUS StormChaser** is the ultimate road helmet for everyday use. It is light, comfortable and excellent ventilated. With these features, the StormChaser stands out during after-work rides in the urban jungle, on steep climbs as well as on a gravel roads.

Available in 14 modern colors.
